Project Experience

- **Archiving Box Portal Multirasa Nusantara
(2022-12 ~ 2023-02)**

PHP - Laravel

This portal is used for data collection of boxes to be stored in the warehouse using racks. Each box has a document in it, where this portal will store all the information entered by the user when inputting documents, later if the user finishes inputting what documents are stored in the box, the portal will generate a box number which becomes a unique number that can be used to search for boxes. There is a feature for automatic placement of boxes, where each division will get its own shelf. Other features are document borrowing, box deletion, archive report, borrowing approval, destruction approval, automatic email when borrowing documents to the approver, and automatic email when approving users who borrow or destroy.

- **E-SOP Portal Multirasa Nusantara
(2023-02 ~ 2023-03)**

PHP - Laravel

This portal is used so that the company no longer spends money only on printing if there are new stores or stores that want to request Standard Operating Procedure. The creation of this portal aims to allow each store to view, download, and print related company Standard Operating Procedure files.

- **Human Capital Information System (HCIS) PT Indonesia Ferry Property (2023-01 ~ Present)**

PHP – Laravel

- Create API User Access.
- Create API Mobile Attendance Clock in and Clock Out.
- Create List Clock In and Clockout Page.
- Create Module Upload Employee Document and download reporting attendance.
- Create Calculate Salary, Tax.
- Create API Leave Request.
- Create List Pending/Approval Status Leave Request Page.
- Create List Pending/Approval Business Trip Page.
- Create API Business Trip.
